Wellness

Bathing and showering - pleasure for all the senses

THE BATHROOM AS A WELLNESS

Wellness means boosting your energy levels and feeling good about yourself in the long-term. An increase in everyday stresses and strains require strategies that aid relaxation. Ayril bathrooms not only offer pleasure and relaxation but they are also vitalising – so why not give yourself and your body a treat!

RELAX IN STYLE

Unique personal design is crucial to creating a sense of well-being in the bathroom. The various bathroom ranges from Ayril and the matching acrylic baths leave nothing to be desired. This material enables an amazing variety of shapes and designs to complement all furnishing styles. On the strength of their form and function, the baths from the 2110 and 2141 ranges, as well as the extraordinary Squaro Superfl at shower tray, have registered.

Ultimate relaxation for the sake of your health

You can find peace and relaxation whenever you want it. Turn your Ayril jacuzzi into your very own oasis of wellness. The beneficial effect on your health of the innovative jacuzzi systems by Ayril supports regeneration and will help you to boost your energy levels. For greater quality of life within your own four walls.

Jacuzzi A sensual pleasure that's good for you

Whether you're looking for peace and relaxation away from the stresses of everyday life or want to boost your health, a relaxing bath in your own jacuzzi can work wonders. It combines three elements that have a particularly beneficial effect on the body: water, warmth and massage.

Water as a source of well-being

Taking regular baths provides a comforting feeling of weightlessness and takes the strain off joints, ligaments and the spine. You'll quickly feel any pain easing, particularly after exercising or if you suffer from problems with your joints.

The comfortable warm massage relaxes body and soul

Massage and warmth help to relax the muscles and release tension. They stimulate the circulation, boost the immune system and improve the metabolism, and this keeps the tissue and skin supple.

Taking a little time out from everyday life

A jacuzzi is just the ticket if you just want to switch off and forget the stresses of everyday life. The warm water has a calming effect that allows all your senses to wind down, ensuring healthy and relaxing sleep. Transform your bathroom into your own personal refuge and recharge your batteries for the next day – in a Ayrat jacuzzi.

19 BATHS

JACUZZI SYSTEM

Air jets in the base of the bath

Water jets in the sides of the bath

Air jets in the base and water jets in the sides of the bath

AIRPOOL

The air system for an invigorating massage. In the AirPool, air is injected into the jacuzzi through special jets and dispersed as fine bubbles. These air jets are located in the base and ensure a stimulating massage. The pipes to the base jets are blown dry after use.

HYDROPOOL

The water system for targeted body massage. The water is extracted and pumped back into the jacuzzi through special (water) jets.

The HydroPool massage jet stimulates the muscles and local metabolism. Residual water is drained away.

COMBIPOOL

The combination of AirPool and HydroPool. The best of both worlds: air jets in the base of the jacuzzi and water jets, depending on the model, in the back, at the sides and/or in the foot area. The jets can also be used separately, for an all-round body massage that gently eases tensions and stimulates the circulation. The CombiPool is also used for hydrotherapy. The residual water drains away and the base jets are blown dry.

Poly Acrylic

Exclusively from Ayral for more than 5 years

Nature perfected

This material available from Ayral has been setting standards in aesthetic jacuzzi design for more than 5 years. Nature perfected – warm, smooth and offering clean design lines, solid and hard like crystal. However, in a break from nature, form is not left to chance, rather it is in the hands of designers. Acrylic is like a new element that exhibits all the properties one could want for baths and shower trays: it can be moulded and is durable and timeless, warm and pure. This innovative material is manufactured in Europe, in the Turkey. Check out the advantages for yourself!

Unique&precise

- Incomparable designs
- Slight dimensional tolerances
- Flush installation
- Ideal for the installation of jet systems
- Precise radii and edges

Clean & safe

- Easy to clean as dirt is almost unable to secure a hold
- Slip-resistant
- Smooth, pore-free and closed surface

Solid & robust

- Shock and impact-resistant, non-scratch, sound-absorbing
- Material thickness from 6 to 7 mm
- Retains its gloss, even after many years of use
- UV-resistant

Warm & pleasant to the touch

- Warm surface
- Good thermal insulation

Showers

Simply wash away everyday life

As relaxing as gentle tropical rain and as refreshing as a fresh April shower: Ayral transforms taking a shower into a unique wellness experience. The large range of different shower trays and enclosures combines maximum comfort with outstanding design, innovative functions and the high quality that is synonymous with Ayral. For feel-good moments that meet every requirement.
